BORDER EXPRESS' IMPROVED INTERNAL CONTROLS

Australian interstate transport and distribution services company Border Express had a paper-based system where invoices were sent around various departments for manual sign-off. With no tools in place to keep track of what had been approved across the company's 12 sites, matching purchase orders with invoices was an unnecessarily drawn-out process.

To improve internal controls and provide greater cost visibility across the business, Border Express added Greentree's Purchase Order module, Approvals & Alerts and eApprovals to its existing Greentree system.

eApprovals is a cost-effective part of an overall strategy to give managers better control over their cost centres, says the company.

The ability to view, approve or reject all purchase orders online has resulted in better visibility and increased internal control. In addition, managers who don't need access to the full system can approve purchase orders via eApprovals, saving licence fee costs.

"Since adding eApprovals, the expenditure approvals process has been cut from weeks to just days."

Supported by over 40 years of transport and industry experience and knowledge, Border Express is an interstate transport and distribution services company with a strong regional network, which is committed to delivering to customers, staff and other stake holders.
