

MYOB Greentree Business Intelligence

Next generation
business intelligence
that puts you in charge

MYOB Greentree | **Qlik** 

See your business in new ways

MYOB Greentree IQ* is powerful software that provides vital information for your business. Powered by the leading business intelligence vendor Qlik, it gives you the ability to explore critical data and simplify analysis, all with a few small clicks.

- 1 **Perform detailed analysis of KPIs**
- 2 **Interactively explore your data**
- 3 **Ask new questions**
- 4 **Uncover new associations at blazing speed**

Experience a 360° degree view of your business in real time

Use an array of data visualisations and reporting to get a greater understanding for further insight, in-depth analysis and validated business forecasting which is accessible anywhere.

You'll get the information you need in seconds, so you can focus on what's important – making decisions that enable the growth of your business.

Be your own data scientist

Designed for users from all skill levels

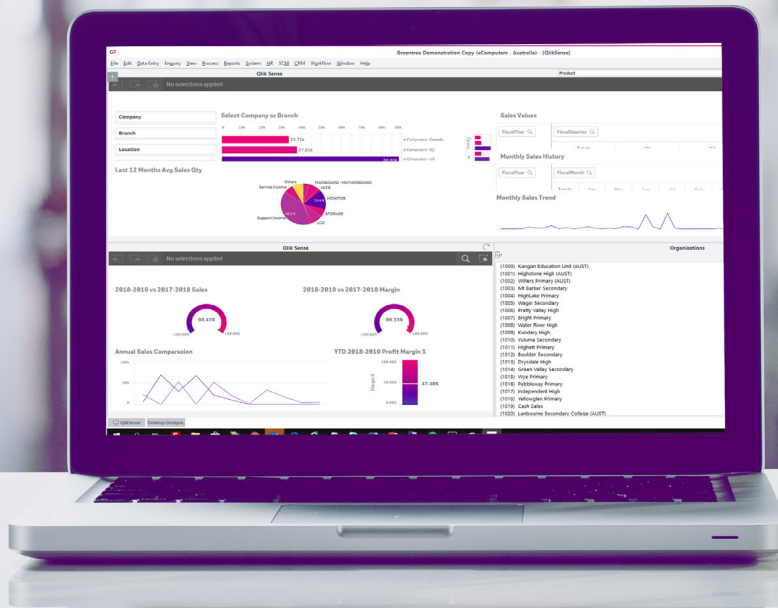

Easily navigate through data with interactive charts, maps and tables

Customisable reporting and unlimited types of analytics

Accumulate intelligent insights through the AI engine

Self-service data creation and data preparation

Collaborate with teams anytime, anywhere

You don't have to be an expert to create smart visualisations or explore data yourself.

MYOB Greentree IQ* integrates Qlik Sense – the modern, responsive and user-friendly solution that has a huge range of analytical tools. Qlik Sense gives you the freedom to create, manipulate and view data as you like.

There are no restrictions on what types of analytics you can view or how it's presented. It's a platform for enterprises and can be customised and extended, scalable across cloud or on premise, and is designed for users from all skill levels.

Within a governed multi-cloud architecture, Qlik Sense delivers unparalleled and powerful self-service capabilities. A drag-and-drop interface allows you to see your data through interactive charts, multi-layer maps and tables as well as giving you the ability to jump from one set of analysis to the other.

Get business insights in seconds

MYOB Greentree IQ* uses QlikView's unique and award-winning 'in-memory associative technology', giving you the ability to drill-down into your data and ask new questions in seconds through guided analytics.

QlikView features inbuilt and ready-to-use data analytics, so you don't need to spend all that time building charts and dashboards yourself. What's more, it's also an agile platform, so any developer can build robust and rich analytical applications.

In just seconds and you can take your data and see it any way you want. Turn it into charts, tables or graphs. Make them 2-D, 3-D, zoom in, zoom out and click anywhere for more detail. It's designed through its analytical applications and dashboards to give users the capabilities to deliver immediate results and further business insight.

Drill right down to transaction level, giving you specific data

Pre-built models for rapid deployment

Tailor pre-built models or create your own

Lightning fast, dynamic architecture

Intuitive interface is easy for any user to understand and use

Value Added Products for Qlik Sense and QlikView

Powered by
Qlik

Just when you think things can't get better, Greentree IQ* gives you a little extra. Enhance your analytics and reporting capabilities by adding Qlik NPrinting and Qlik GeoAnalytics.

Create and distribute polished reports

Qlik NPrinting is an innovative reporting and distribution solution. You'll produce informative and vibrant reports that illustrate business insights and data. You'll be able to easily share these reports in different formats, as well as search and filter for specific reports to deliver the right information to the right people.

**Fast and easy
report creation**

**Reports delivered
the way you need them**

**Collaborative analytics
for organisations**

Powerful map visualisations and location-based analytics

Qlik GeoAnalytics not only provides comprehensive mapping capabilities, but also moves beyond visualisation with built-in support for a broad range of advanced geoanalytic use cases to help reveal crucial geospatial information and expose hidden geographic relationships.

**High performance,
interactive mapping**

**Gain geospatial
insight**

**Broad location-
related cases**
